Curse tablets

Laos
3/Lu 63,
Laos,
c.300 BC

Curse tablets

- First examples are from Attica and Sicily, in Greek, c. C6th BC
- Found all over the Greek and Roman worlds
- Usually written on lead or lead alloy (soft but durable)
- Normally folded over; sometimes pierced with nails or accompanied by figurines
- Found in graves, wells and springs, and sanctuaries

Cumae 10/Cm 15, Cumae?, c. 100-50 BC

Uetler 7: Bleitafel (Cumae?), im Akad. Kunstmuseum, Bonn (C143a).

Oscan names	{	I. harines. her. mature[-?-] c. eburis.
Latin names	{	pomponius. m. caedicius. m. f. n. andripius. n. f.
Mixed curse formula	{	pus. olu. solu. fancua(s) recta(s). sint. pus. flatu sicu. olu. sit

“May the tongues of these men be rigid; may the breath of these men be dry.” (?)

Roman association of magic with Oscan

“ The curse which follows the names is in a mixture of Latin and Oscan... *Defixiones* are special texts, in which obfuscation was often deliberately sought to enhance the power of the magic, and it is that fact which probably lies behind the language mixing in this case.” Adams (2003) 128.

“Once bilingual Oscan speakers had begun to draw heavily on the form of Latin official phraseology, they were succumbing to the dominance of Latin culture... But curse tablets add a different dimension to the picture. Here the imitation seems to operate in the reverse direction, no doubt because of **the potency of Italian regional magic** in the sub-culture of regions in which Latin and Italic existed side by side.” Adams (2003) 145.

Romans and Etruscan – magic and divination

Local developments in Bruttium

- Not always straightforward borrowing or code-switching
- Unusual local/regional developments that don't happen elsewhere in either Greek or Oscan
- Can we see these kind of developments as contact-induced?
- Might instead show the importance of local tradition in magical language

Conclusions

- South Oscan appears to associate magical power with Greek
- This may be linked to the earlier use of Greek in curse tablets in Italy
 - May be tradition
 - May be the “correct” language for magic
 - Cf. Roman association of magic with Oscan, divination with Etruscan
 - Might compare also Roman association of Greek with medicine
- May be deliberate obfuscation, using the two languages best known to these individuals, to make the curse more powerful
